Note: While the scheduling tables are limited to providing 7-9 people per shift, you can use them to schedule any number of people. Just find a template that you like and use it multiple times to schedule your people.

For example, if you need to schedule 100 people you can use a template that requires 5 people, 10 people, 20 people, etc. Simply divide the 100 by 5 or 10 or 20 to find out the number of times you need to reproduce the template to schedule all of your 100 people.

If you decide to use one of the Series 3 Template Schedulers for your scheduling, you can copy the template into the Template Scheduler just one time and then assign several people to each of the schedule legs.
